

Pre-service teacher's section

Successful aspects of the first half of placement in relation to the Australian Professional Standards for Teachers (see the learning outcomes and AITSL descriptors within Unit Outline):

I have had a great placement so far! I have been able to build a rapport with all my students. I use many teaching strategies to improve student learning such as questioning students thinking aloud. Before teaching a lesson I consider all learning objectives I would research the content and plan fun, engaging lessons.

My goals for the remainder of the round are: (see the learning outcomes and AITSL descriptors within Unit Outline):

I am going to continue to cater for all abilities. I am going to plan lessons that all students can do (open tasks). Another goal is to continue to develop, select and use informal and formal, diagnostic, formative and summative assessment strategies. As the school year is close to the end, I will be mindful of managing behaviour. I will also be flexible as many things will pop up that are unexpected.
